THE POWER OF GREEN. 2016-2017 ANNUAL REPORT

THE POWER OF GREEN.
“Washington Green Schools helped us put student learning to use in a tangible way that fosters authentic engagement. My hope is that students take this inspiration to lead lives of continued community stewardship.”

— Katelen Phelan, Science Teacher, Sylvester Middle School

I met Nura and her fellow Green Team members from Stevens Elementary in Seattle last spring. Nura explained that on a recent visit to her home country of Ethiopia, she became upset when she noticed pollution in the streets. When Nura returned to Seattle, she was determined to become a leader for a healthy environment. With our resources and support, Nura and her peers took action at their school. Their first challenge was reducing food waste during lunchtime. Next they moved on to conserve energy throughout the school building. Led by the Green Team, the students, teachers, staff, and families at Stevens now embrace sustainability, both at school and at home. Washington Green Schools gave this school community powerful opportunities to learn, create change, and get recognized for their efforts.

Last year Washington Green Schools served more students than ever before, and we formalized our commitment to equity in our programs. Another milestone was receiving a multi-year grant from Social Venture Partners; this investment focuses on strengthening our organizational capacity. Our goal is to engage more students and school communities across Washington to be leaders for the environment.

Like many other young people, Nura was motivated to make a difference. Your support makes it possible for students like her to turn their motivation into action. Thank you for being a part of this powerful community.

Meredith Lohr
Executive Director

Income
- Individuals $160,187
- Foundations & Grants $151,000

STEM Literacy
730 young people strengthened 21st century skills, such as critical thinking and collaboration, through our new science curricula.

Youth Leadership
67,000 students—32% of whom are students of color—engaged in environmental action in their school communities.

Certified Green Schools
36 schools earned the next level of Green Schools certification by tackling issues around waste, water, and energy.

Washington Green Schools helped us put student learning to use in a tangible way that fosters authentic engagement. My hope is that students take this inspiration to lead lives of continued community stewardship.
